

True ownership of Virtual Items.

Hoard is changing the future of the Gaming Industry. Through revolutionary technology, based on blockchain, Hoard offers a unique value proposition for game players and game developers. It enables them to take advantage of true ownership, virtual exchange and crowdfunding games.

The Gaming Industry is changing. We are the response.

Today more and more people are selling virtual goods and services. With Hoard, all of this can be tokenized and made tradeable in a manner that is honest for all participants. We believe that Hoard will drive the global revolution in the Gaming Industry.

Hoard Delivers an Ecosystem of Products to Support the Gaming Industry

Marketplace

Enable true ownership of virtual content in video games via blockchain tokens: in-game currencies, items, character skills and abilities, real estate, and much more would become truly user-owned.

Software Development Kit

Through revolutionary technology, based on blockchain, Hoard offers a unique value proposition for game players and game developers. It enables them to take advantage of true ownership, virtual exchange and crowdfunding games.

Crowdfunding Platform

Serves as a fundraising platform for game developers. Instead of forcing the developer to give some rewards, they can instead give contributors actual in-game items and currency, possibly rare and unique.

Token Distribution

The HRD token serves as a utility token and value bearer of all content on the Hoard Marketplace. Millions of gamers all over the world will trade their virtual items on the Hoard Marketplace, either overtly or by interacting with the exchange inside of their games.

Token Sale

| | | | | | |
|------------|-----------------------|---------------|---------------------|--------------|----------------|
